# SEASONS

by Porcelite®

Crafted in Porcelite professional vitrified porcelain, each piece is hand decorated, resulting in an individual speckling effect and a reactive contrasting rustic band to frame. No two pieces are the same to create the perfect platform for a truly eclectic look.

All items in the Seasons collection are microwave and dishwasher safe

Seasons

Presented in a palette of eight complementary colours, inspired by the vibrant shades of the changing seasons. Created to work perfectly in a suite, or mixed and matched; Seasons offers unlimited presentation options.

# Nordika

Nordika is a new shape for Costa Verde designed by Studio Levien. The inspiration comes from the cool simplicity of Scandinavian design and landscape. The plate is a hybrid between a coupe and a rim, a large flat centre and narrow steep rim. This provides the maximum area for presenting food and for easy handling of the plate, a lovely combination of beauty and functionality.

  All items in the Nordika collection are microwave and dishwasher safe

# Back of House

High performance solutions designed to meet the demands of busy professional Kitchens.

# SMART RACK

## The perfect Washing & Sanitary Storage System

Glassware stays clean when in storage, therefore no need to re-wash before use.

Open outer wall is closed & keeps out pollutions, such as dirty water, viruses, insect and pest, contaminant, dust and dirty hand. Clean glassware would need to be washed again after being polluted, it wastes time and money.

### Perforated bottom

Large perforated bottom facilitates thorough penetration of water and detergent during washing.

### Fingerprints-Free Glass

Full-sided rack protects the washed glass against unnecessary touch during storage or transport to destination, which reduces the time needed for additional polishing.

### Quick Identification of Glass

Various colors of base rack bottom help quickly identify the type of glass even from a distance, without the need to remove stacked baskets.

### Health Safety

Full-sided rack and extra options, namely upper cover and trolley, assure efficient and safe transport of glass and protect it against pests.

### Convenient Storage & Transport

Suitably shaped edges of rack allow stacking, which reduces the footprint in warehouse and increases packing and transport efficiency.

### No More Wet Floor

Collection reservoir of the trolley collects the water dripping from the glass in the baskets.

### Manoeuvrability

Easy car and manual transport.

### Detergents & High Temperature Resistant

Made of polypropylene highly resistant to detergents and high temperature (up to 199°F/+93°C).

## NSF HACCP

- Smart Racks are easy to handle with 1.3cm overlap area and smooth sides.
- These racks interstack with all racks from major dishrack manufacturers.
- Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying.
- Extremely durable, long-lasting polypropylene built to withstand chemicals and high temperatures up to 93 degrees celsius.
- Closed external walls are designed for optimum cleaning and storage racks keep finger and contaminants out and reduce risk of breakage and injury.
- Easy to carry, easy to grip handles on all four sides as well as smooth overlapping sides and rounded corners reduce the risk of injury.

# Choose the correct rack

1

Measure the maximum diameter of the glass (stemware or tumbler) to determine the number of compartments.

2

Measure the maximum height of the glass (stemware or tumbler) to the top edge of the rim to determine the compartment height.

# Ceramic product benefits

## Microwave Safe

All plain white products are completely safe in any microwave oven. Products with metallic decoration however should not be used in microwaves.

## Dishwasher Safe

All products are resistant to attack by dishwasher detergents and have been tested to many thousands of cycles.

## Oven safe

Our Ceramic bodies are fired at very high temperatures. This makes them oven proof, exceeding the 180 degrees Celsius temperature difference laid down as the European standard.

## Freezer Safe

All products can be used in any freezer.

**microwave**  
dishwasher safe  
**oven proof**  
freezer safe  
**craze proof**  
strength  
**glaze durability**

### **Craze Proof**

The body recipes and manufacturing processes utilised in the production of products means they are completely vitrified and therefore totally impervious to water making all items craze proof and very hygienic to use.

### **Strength**

Both Porcelite and Australian Fine China products are extremely strong, far exceeding European guidelines for catering ceramics (BS 4034). Both carry a five-year guarantee against edge chipping (on selected items).

### **Glaze Durability**

All products have glazes that have been formulated to withstand the rigours of the catering environment. They will not stain and are resistant to metal marking and abrasion in normal usage.

# Product care information

## Ceramic

All ceramic products are suitable for machine dishwashing.

It is important that the manufacturers washing guidelines be followed at all times. Excessive rinse temperatures i.e. above 60 degrees Celsius and overdosing of detergent will cause damage to the glaze surface.

If removing food residue prior to washing a plastic scraper should be used to avoid damaging the glaze surface. Never use metal utensils or cutlery to clear plates as this can cause metal marking.

Cutlery should never be washed in amongst crockery and specialist cutlery baskets should be used at all times. Do not machine wash crockery with other metal objects such as baking sheets and pans as this can cause metal marking.

Use rubber or plastic mats on stainless steel surfaces and shelving in order to reduce the potential for metal marking.

## Acacia Wood

Acacia wood is not suitable for washing in commercial dishwashers.

The appearance of the product can be maintained by regularly wiping the surface with vegetable oil.

Under no circumstances should Acacia wood be allowed to soak in water as this will lead to the product warping and splitting.

The product should be hand washed in warm soapy water and dried immediately. As wood is a natural product its surface will mark over a period of time.

# ceramic acacia wood cutlery melamine bamboo fibre glass

## Cutlery

All cutlery can be washed in a dishwasher.

Never store cutlery in a damp atmosphere as this will cause corrosion. Cutlery should also never be left to soak prior to dishwashing.

Cutlery should be washed as soon as possible after use, if left dirty certain substances in food such as acids and fats can cause corrosion.

Cutlery should be washed in an upright position with the head in an upwards position, in specialist cutlery baskets. Do not overfill cutlery baskets as this restricts water flow during the cleaning process.

Once washed cutlery should be immediately wiped with a clean towel or dried using a cutlery polisher. This will remove any salt residues left after the washing process and prevent corrosion and pitting.

## Melamine

All Melamine products can be cleaned in a dishwasher.

Melamine products are not suitable for usage in ovens or microwave ovens.

Do not use abrasive detergents with bleaches, wire scourers or metal implements to clean melamine products as this will scratch the products surface.

Melamine products are suitable for Bain Maries.

Designed to operate in temperatures from -30 to +70 degrees Celsius.

## Glass

All glasses can be washed through a commercial glass washer.

A non-caustic detergent must be used as caustic detergents can damage the surface of glasses and make them appear dull.

Always wash new glasses prior to their first usage.

Never wash glasses at a temperature of above 60 degrees celsius as higher temperatures can cause debris to be baked onto glasses. Do not put cold liquids into hot or warm glassware as this can cause glasses to crack, it is also advisable to warm glasses prior to filling them with hot liquid by running them under a hot tap.
